Advances in modern biology revolve around automated data collection and sharing of the large resulting datasets. I am considered a pioneer in bringing algorithms to the study of biological data, and a founder in this community that I have witnessed grow so profoundly over the last 30 years. I have made major contributions to many areas of computational biology and biomedicine, largely, though not exclusively through mathematical innovations, as demonstrated by over 30,000 citations and an H-index of 79 (H5-index of 61) for my scientific papers and widely used software. I have trained more than 100 undergrad, MEng, PhD students and postdoctoral fellows, many of whom now hold top positions, including tenured Professors: Serafim Batzoglou– Stanford University tenured; Philip Bradley– Fred Hutchinson/U. Washington; Manolis Kellis– MIT; Lior Pachter– UC Berkeley/Caltech; Mona Singh– Princeton University; and Russell Schwartz– CMU. My PhDs with Assistant Professorships include Michael Baym– Harvard; Leonid Chindelevitch– Imperial College London; Hyunghoon Cho– Yale.; Brian Hie– Stanford; Rohit Singh– Duke; Y. William Yu– U Toronto/CMU; and Ellen Zhong– Princeton. In recognition of my success, I was recently the 2019 recipient of the International Society for Computational Biology (ISCB) annual Senior Scientist Award, the pinnacle award in computational biology; and in 2020, received the AWM-SIAM Sonia Kovalevsky Lecture Award and was elected to the National Academy of Sciences

I continually and actively engage in community service and advocating diversity, through my roles as Vice President of ISCB, Head of the RECOMB Steering Committee, and member of the NIH NIGMS and NLM Advisory Councils. I have served as both Proceedings and Conference Chairs for the two top conferences in my field— RECOMB and ISMB. I have headed a workshop at ISMB 2016 on Gender Equality, and been instrumental in including women and diversity as ISCB Fellows and Awards Chair. I have served as an Executive Editor for Journal of Computational Biology, Associate Editor for Bioinformatics, and on editorial boards of PNAS, Annual Reviews for Biomedical Data Science, IEEE/ACM TCBB, Genome Biology, and Cell Systems. I have given keynote addresses and distinguished lectures at SIAM Annual Meeting, RECOMB, ISMB/ECCB, ACM-BCB, RECOMB-RSG; RECOMB-BE, Norway's Volterra Lecture, Gordon Research Conference, HCA, CSHL, NIH Pi Day, Israeli Bioinformatics Symposium, GenoPri, AMS-MAA Joint Meetings and UCSD's Rosenblatt Lecture.
